

5 DIMENSIONS OF TEACHING & LEARNING

OVERVIEW

You consider a shared vision for excellent teaching a top priority for improving student learning. And you're compelled by the student experiences reflected in our research-based 5 Dimensions of Teaching and Learning™ (5D) framework. But even with the framework, do you find it challenging to bring your vision to life?

We collaborate with you to provide contextualized professional learning about the 5D framework, so you know how to use it as a tool to create cultures of rigorous learning in your schools.

YEARLONG

ONSITE

COACHING

"I now have the ability to go into the classroom and look for elements of the teaching practice with a more discerning eye — and help a good teacher become a great teacher."

— Principal

WHAT YOU'LL GAIN

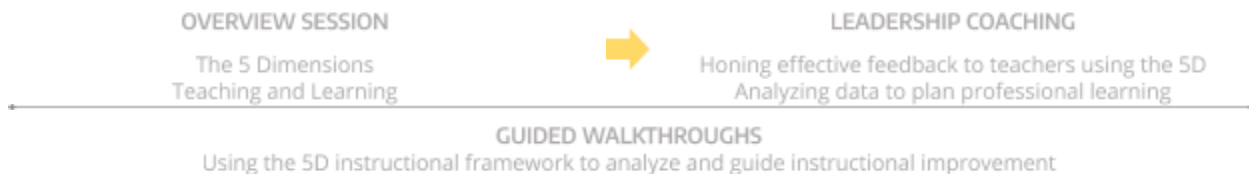

- **Students** get increased access and opportunities for meaningful learning
- **Teachers** find a common language to guide growth in their teaching practice: purpose, student engagement, curriculum and pedagogy, assessment for student learning, and classroom environment and culture
- **Leaders** gain a lens to guide observations, scaffold feedback, and plan professional learning

WHO IT'S FOR

The 5 Dimensions of Teaching and Learning is designed for central office leaders, principals, and teachers seeking a common language for high-engagement learning.

HOW IT WORKS

We combine professional learning sessions with group discussion, facilitated guided walks, and personalized coaching to analyze classroom practice. This sets the foundation for using the framework in your school and district to support teacher and student learning.

The 5 Dimensions of Teaching and Learning offering can be accompanied by our online assessment, the Measures of Instructional Leadership Expertise (MILE™) to identify baseline strengths and areas for growth.
